Workshop goal

In Germany, the CrossLab project was launched in August 2021. In this project, four universities will develop cross-reality labs, looking at the three perspectives of didactics, technology and organization. The aim of the workshop is for the international community to answer the question "What mistakes should we not make?"...

To whom is the workshop addressed

The workshop is aimed at the international community and collaborators in the CrossLab project and other interested persons.

The Methodology

The workshop will start with input from the CrossLab project. The initial situation, the goals, the challenges and the procedure will be presented. In a second step, the expertise of the experts will be used to solve the challenges and discuss further steps.

The Workshop duration

The workshop should last 90 to 120 minutes, depending on the number of participants.
